IT312 Web Applications Engineering
Project – Phase#1
First Term 2026-2027.
Due date: September 24, before 11:59 PM.

جامعة الملك سعود
King Saud University
كلية علوم الحاسب والمعلومات
قسم تقنية المعلومات

Project Description

In this project you will develop an **Interest Club Website** that brings people together around a shared interest. The club offers workshops, classes, activities, and other relevant experiences. The website introduces the club, presents its team and available offerings, and allows members to explore opportunities, submit participation requests, and share feedback about completed experiences. The result will be a simple front-end academic prototype.

Each team will design a different club based on an interest of its choice. Examples include technology, literature, photography, cooking, sustainability, community development, or another suitable interest.

The chosen club must have a positive mission. It should explain how the club helps people develop useful skills, discover interests, support their wellbeing, express creativity, connect with others, or contribute positively to the community.

The website includes the following users:

- **Club Managers** present the club's offerings, add new offerings, and maintain the list of activity leaders and instructors.
- **Club Member**s explore available offerings, request to participate, and evaluate experiences after completing them.
- **Activity leaders and instructors** are the people who organise activities, teach classes, deliver workshops, or lead experiences.

The website must contain at least the following pages:

- **Home Page:**
  - Introduces the club through its website name, logo, and a short description.
  - Provides at least three club offerings. An offering may be a workshop, class, activity, or experience. Present each one with an image, a clear name, and a brief explanation.
  - Shows club-member reviews with a rating and written feedback.
  - Provides a **navigation bar** containing links to the Club Manager Dashboard, Club Member Dashboard, Club Offerings Page, and About Us Page.
  - Ends the page with copyright and contact details in the ***footer***.
  - Extra Section (Required): Here's your chance to show off your team's creativity! Add a new section to the homepage. It can be anything you like, as long as it is related to the website.
- **Club Offerings Page:** Acts as the complete catalogue of the club's workshops, classes, activities, or experiences. Every offering must show its name, description, price or registration fee, and image. The page must support sorting by name and by price. A free offering should have a price value of zero.
- **About Us Page:** Presents the club's full mission and introduces its activity leaders and instructors. Show every activity leader's or instructor's name and photograph, and make each name a ***link*** to that person's Profile page. In addition, it includes a "Join Our Team" **form** requesting Name, Photo, Date of Birth, Email, Area of Expertise, Skills, and Education, together with a Submit button.
- **Activity Leader or Instructor Profile Page:** Provides detailed information about one activity leader or instructor. Use a **table** to organise the person's Name, Photo, Date of Birth, Email, Area of Expertise, Skills, and Education. You are required to use spanning cells in this table; the cell containing the person's name should span all columns.

- **Club Member Dashboard Page:** This page is viewed by the club member, and it includes the following parts:
  - **Shows previous participation requests**: For every request, show the offering name, request date, cost, and one of these statuses: pending, declined, or completed.
  - It provides links to the following pages:
    - **Request to join an Offering Page**: This page displays a form that allows a club member to submit a participation request for an offering. The form allows the club member to choose the offering from a *drop-down list*. The form should ask also for the following information: the member's full name, preferred date, and a Submit button.
    - **Offering Evaluation Page:** This page displays a *form* that allows a club member to evaluate a completed offering by selecting it from a previous-offering drop-down list, providing a rating and written feedback, and submitting the evaluation using a submit button.

- **Club Manager Dashboard Page:** This page is viewed by the Club manager. It includes the following parts:
  - **A *list* of** all offerings by this manager.

- ***Links*** to the following pages:
  - **Add a New Offering Page:** Provides a ***form*** through which the manager can enter an Offering Name, Image, Price or Registration Fee, and Description. The form must include a Submit button.
  - **Manage Activity Leaders and Instructors Page:**
    - Lists all activity leaders and instructors using a small image, name, and ***checkbox*** for each person. The manager can select one or more team members to be deleted.
    - Provides a form for adding a new activity leader or instructor. The form must request Name, Photo, Date of Birth, Email, Area of Expertise, Skills, and Education, and must include a Submit button.
- **Note:** Login, user accounts, databases, payments, actual registration, actual additions, status management are outside the scope of this project. Detailed requirements for Phase 1 are listed below.

Phase 1

Using the Phase-1 Template available on LMS, create one document containing:

1. Website **Title**: choose a clear title that reflects the club's identity and selected interest.
2. Site **Goal** and Mission: describe the purpose of the website and the positive contribution the club intends to make.
3. Site **Audience**: state who the website is intended for.
4. **Competitive Analy**sis: identify at least three Competitor/similar websites and provide their names and URLs. Evaluate them using the four criteria provided in the Phase 1 template.
5. **Functionalities**: list the actions available to each user. Express them using verbs rather than writing page names. (e.g., The Club Manager shall be able to …)
6. **Extra Functionalities**: suggest at least three additional functions that would suit the proposed website.
7. **Sitemap:** organize all required pages and illustrate how they connect. Represent the existence of multiple Activity Leader or Instructor Profile pages with an appropriate symbol.
8. **Wireframes:** You must provide wireframes for each page in the sitemap and write the page title at the top of the wireframe. Indicate navigation bars and links, relevant breadcrumbs, images, content areas, form fields, controls, buttons, and other relevant interface elements. Use meaningful interface labels and dummy text for body content, without colours or detailed visual styling.
9. **Generative AI Use:** when Generative AI has been used, document the task, the prompts entered, and the output obtained.

Submission

- Submit one Phase 1 document per team through LMS: **Due: Sep 24, 11:59 PM.**
